Should We Conserve Natural Resources?

First, I thought that we should protect the earth because if we didn't everyone would be at home watching TV instead of learning.

Then, I learned that you can recycle cans, plastic and bags. I learned that 81% of landfill trash can be recycled. After watching the "Nature is Speaking" video I realized if we didn't have flowers we wouldn't be here today. After researching "A Way to Help Planet Earth" I discovered that a small bottle can be something bigger and better if you recycle.

Now, I think if we recycled everything the earth would be clean and not dirty, and this will help us conserve natural resources.
