

Should we conserve nature resources?

First, I think we should conserve our nature resources because it will help make the earth a better place. According to the video, "Nature is Speaking", I learned that nature doesn't need people but people need nature. After researching "A way to help planet Earth", I discovered that a small bottle can be something bigger and better if we recycle.

Then, I learned that 81% of landfill trash can be recycled. Lots of things we throw away can be recycled.

Now, I think we should conserve nature resources because it will help and protect the Earth.
