## Should we conserve Natural resources?

Frist, I thought if we didnt  
have trees How could we breath  
because trees have oxigin. How  
could we live if we didnt have  
oxigin Please do not cut down  
trees.

Then, I Learned.  
According to the video, Nature is  
speaking, I Learned that flowers  
mack fruit and vetibuls.

## Now I thank

Frist, I thought we could  
get anythaning in the world  
But now I thank that we can't  
have all the thanings we want. we  
need the thanings that are helthey.  
We need helthey drenks. all cinds  
of stuff is helthey. But some thanings  
are not helthey. do not eat Jonk.  
were helthey thanings come is  
from fruits and veshtibuls. we  
Plant them so we could have  
stuff at Krogers.
