

Emma

Should we conserve natural resources?

First, I thought I think we should conserve our earth because if we don't protect and clean the earth the earth and people will be bad.

Then, I learned that 81% of the landfill trash can be recycled. According to the video Nature is Speaking I learned that Nature makes life. After researching, a way to help planet earth, I discovered that a small bottle can be something bigger and better if you recycle.

No

Now, I think. After everything I have learned I think that kids and adults can recycle so our world will be more healthy so get off the couch and go recycle.
