

Video Games

First I thought video games were good for you. Then I learned that gamers who play 10 to 15 hours a week have better vision than those who don't. They are able to read fine print and tell different levels of grey. Playing action games does not lead to attention problems. Did you know people who have video games solve problems more quickly. People who play video games are able to keep track of more objects around them. The three parts of the brain that are used for attention are actually more efficient in video games.

I still think that video games are good for you.

My reason is that video games may have some flaws, but video games can be a teaching tool. On the video, "How do Video Games Affect Behavior" says, "Video games are a great teaching tool, because you are faced with situations and have to make decisions."

My second reason is you are able to solve problems. On, "How do video games affect behavior" says, "You get better at problem solving and making choices."

My last reason is video games help your vision. On, "Your brain on video games" says, "Gamers who play 10-15 hours a week have better vision than

Video Games

those who don't." First I thought video games were bad for you. This is why I think video games are good for you.

to 15 hours a week have better vision than those who don't. Their eyes to read the text and fill different levels of grey. Playing action games does not lead to attention problems. Did you know people who love video games solve problems more quickly. People who play video games are able to see track of more objects around them. The three parts of the brain that are used for attention are actually more efficient in video games.

I still think that video games are good for you.

My reason is that video games may have some flaws, but video games can be a teaching tool. On the video "How do Video Games Affect Behavior?" video games are a great teaching tool, because you faced with situations and have to make the right choice. My second reason is you are able to solve problems. On "How do video games affect problem solving?" you get better at problem solving and making choices.

My last reason is video games help you. On "How brain on video games?" says "Games are play 10-15 hours a week have better vision than
