

Gaming is bad for you

Why gaming is bad for you is because, when you have to get up every morning for school you don't want to because you played violent video games all night long.

My first reason why gaming is bad for you is because, it makes you don't want to work in school and getting good grades but you won't when you play video games because you should go to sleep and pay attention in class.

My second reason why gaming is bad for you is because, when kids see that the video games have violent games. The kids think it's ok to be violent to other kids at school because they saw it on a violent video game.

My third reason why gaming is bad for you is because, you don't want to do anything your parents say. You just to keep playing video games and they are not good for you either.

I hope you read my three reasons why video games. If you didn't you should because, it could stop you to be playing violent video games.
