I the government should not control what we eat at lunch.beacause our parents and ourselfs have the right. We should not be forced to get vegetaibels or fruit. The lunch is OURS and we get to chose it.
The lunch a school shood bc somthing healthy and tasty. I think this beacause they need to be healthy but tasty so people will eat them.

In the Article "What Should students have for lunch." The author says two cons of Healthy hunger free kids act are wasted food and that students dont like the lunches. I think that they should get food that students like and will eat so they don't get wasted.

In the Article "Schools want to choose there own lunch menues" The autor states the rules are working. I think if they are working Why are the kids still away the food. Everyday I see people throw away

Gracie 23 (H)

The government should not control whats being served in the school cafeteria because the food that is served is food students dont like. kids throw fruits and vegtables in the trashcan. You can't always have sweets, you need healthy food too, but the government is serving way to much healthy food. What should be served for lunch should be less fruits and vegtables, but more of what kids like. They should serve better deserts. They need less sugar free food and more food with sugar. There should be white bread because children don't like whole wheat bread.

In the article "What Should Students Have For Lunch" the author says "The rules make lunches cheap for students, but they cost schools money." I agree because of the healthy act the school has to pay for the food and they already don't have enough money to do things with the school. They have to take the teachers money.

In the article "Schools want to choose there own lunch menus" the author

The goverment Should not get to control what we eat, I think it should be heathy, but it sould be what Kids like. I think Rolls Should be served but not Wheat Rolls. you Should get to choose if you want fruit or not Some people don't like fruit. also you should not have to get a meat when you go threw the line if you don't want a meat you Should not have to get a meat. In the Article what should Shuden't have for lunch the Auther says two cons of the Heathy hunger free Kids Act are washed food and that that Students don't like the lunches. I agree because Kids don't like what they eat for lunch so they trow it away and then they are hungry. so when they get home what will they get when there at home junk food So the lunch at school they don't like so they don't eat it and when they get home they are really hungry so they will eat more junk food. In the Article What should students have for lunch it says Michelle obama thinks our goverment knows better than parents. I do not agree because are parents Know us better than the goverment. Are Parent know what we like and are parents fix us food ever night for dinner I think are parent know what we want for lunch. In conclusion, I dont support the goverments involvement in school meals. The goverment Should Not get to choose what we eat because it doesent mader if we eat heathy food at school all day long. It maders what we eat at home if we eat bad Stuff at home you would become obese. Cust because you eat heathy food at school it doesent prevent you from being fat. It depends on the food and snacks you eat at home.

What should students have for lunch?

The government shouldn't control what's being served in school cafeterias because We don't eat most of the heathly food. We dersever to choose what we eat bot not like candy bars and other really unheathly foods. I think we should have good foods children like but some heathly things like chocolate covered strawberries. It has heathyness and goodness altogether.

In the article, "what students have for lunch" the new rules try to control everything about school meal. I disagree because we deserve food we want and not get controled by the goverment. Plus the school should control the meals they know our everyday meals.

In the article, "what students have for lunch" the first lady and other supporters of the rules haven't listened to complanits. I disagree because they shald change our foods and listen to what we have to say about what she did. Plus we eat our school meals everyday.

Aliza DeLello

In conclusion, I do not support the goverment involvement in school meals. The Goverment should let school teachers and the lunch ladies control our lunches. Plus we can still be obese at home.

In conclusion, I do not support the goverment involvement in school meals. The goverment should not get to choose what we eat because it dosent mader if we eat heathy food at school all day long. It maders what we eat at home if we eat bad stuff at home you would become obese. Just because you eat heathy food at school it doesn't prevent you from not being fat. It depents on the food and snacks you eat at home.
